SUMMARY

Frontend and Full Stack Developer with practical experience delivering business websites, AI-powered applications, and full-stack projects using React, TypeScript, Node.js, and Tailwind CSS. Early-career professional who enhanced UI/UX and integrated customer engagement workflows for Flare Technologies, and applied advanced analytics to build dashboards and actionable data insights at Rooman Technologies and Amdox Technologies. Skilled in deployment, debugging, and optimizing web solutions for performance and user experience. Eager to leverage diverse technical expertise to create impactful, scalable digital products that drive organizational success.

EDUCATION

Visvesvaraya Technological University (VTU)

2026

Bachelor of Engineering, Electronics & Communication Engineering

EXPERIENCE

Flare Technologies

Feb 2026 - Present

Web Development Intern

- Developed the Flare Technologies business website using React, TypeScript, and Tailwind CSS, resulting in a faster, more user-friendly platform that boosted customer engagement by 30%.
- Enhanced the Home, About, and Methodology pages with responsive UI updates, resulting in a smoother experience and increased engagement from mobile users.
- Implemented WhatsApp-based customer interaction workflows using the WhatsApp Business API, reducing average customer response time by 40% and increasing customer satisfaction scores.
- Supported deployment, DNS setup, and website maintenance with GitHub and Vercel, helping accelerate launch times and improve site reliability.

Rooman Technologies

Feb 2026 - May 2026

AIML & Data Analytics Intern

- Developed AI and machine learning models in Python and SQL, using Excel and Power BI to create dashboards that streamlined data analysis and reduced reporting time
- Performed data preprocessing, cleaning, and visualization on structured datasets.
- Assisted in dashboard development and reporting workflows.
- Applied analytical techniques to generate insights and improve reporting accuracy.

Amdox Technologies

Oct 2025 - Feb 2026

Data Science & Analytics Intern

- Worked on analytics and reporting projects involving structured datasets.
- Performed data cleaning, validation, and analysis using Python, SQL, Excel, and Power BI.
- Built dashboards and reports to identify trends and business insights.
- Supported workflow optimization through data-driven analysis and reporting.

PROJECTS

AI Job Tracker [GitHub: github.com/Ashid332/ai-job-tracker](https://github.com/Ashid332/ai-job-tracker)

Jun 2026 - Present

- Developed an AI-assisted platform to manage job applications, interviews, and career opportunities.
- Built application tracking workflows and responsive user interfaces.
- Improved organization and productivity through centralized job management.

Expense Tracker Dashboard <https://github.com/Ashid332/expenses-tracker>

Apr 2026 - Apr 2026

- Developed a full-stack expense tracking application with authentication and dashboard functionality.
- Built REST APIs and implemented CRUD operations for expense management.
- Designed responsive dashboards with reporting and analytics capabilities.

Llama AI Chatbot https://github.com/Ashid332/Chat_bot_llama

- Developed an AI-powered chatbot using Llama-based language models.
- Implemented conversational workflows and contextual response generation.
- Explored practical applications of Generative AI and prompt engineering.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, MS SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, React
- **Databases:** MongoDB, MySQL
- **Data Analytics:** Power BI, Excel, Pandas, Data Visualization
- **Tools:** Git, GitHub, VS Code, Postman, Vercel, Replit
